Bilfinger set to create €400m engineering and maintenance business following UK merger

- **Bilfinger UK and Bilfinger Salamis will merge to create new €400 million turnover business under the Bilfinger UK brand**
- **The move will combine the strengths of the two firms to expand the services and solutions it can provide to customers**
- **The new business will employ 5,000 people at peak periods with 14 onshore locations across the UK's key industrial hubs**

Global engineering and industrial services company Bilfinger will create a new €400 million turnover business following the merger of its two core UK entities.

Warrington-based Bilfinger UK and Aberdeen-based Bilfinger Salamis will trade under the Bilfinger UK brand, creating one of the UK's largest tier one contractors with 5,000 employees during peak periods and 14 onshore locations across the UK's key industrial hubs.

The merger will combine the onshore and offshore capabilities of the two businesses. It will position the company as a key contractor for delivering large renewable energy projects as the UK transitions to net-zero and expand the services and solutions it can provide to customers in oil and gas, food and beverage, chemical, utilities and pharmaceutical.

The move will also support Bilfinger UK's diversification and growth strategy as it targets new markets for its services. The business will be led by Sandy Bonner, executive president of the UK region for Bilfinger and managing director of Bilfinger Salamis.

The merger will complete on 1st January 2022.

Sandy Bonner said: "The sectors we operate in are changing rapidly as the UK accelerates its energy transition. Combining the strengths of both businesses will create a unified proposition to respond to the shifts in market demand."

BILFINGER

“The merger will position the company as a contractor of choice to deliver major renewable energy projects, strengthen our existing presence in our traditional markets of oil and gas and utilities and target growth in power, food and beverage, chemical and pharmaceutical.

“We’ve already been working together on projects for hydrogen plants, carbon capture facilities and onshore and offshore wind, and the move will enable us to face the market as one integrated engineering and maintenance, modifications and operations business.”

Bilfinger Salamis UK is an established provider of maintenance, modifications and operations services to the oil and gas, energy, petrochemical, renewables, nuclear and utilities sectors covering onshore and offshore facilities across Europe. With bases in Esbjerg, Aberdeen, Groningen and Great Yarmouth, the business employs up to 2,000 people and has supported the energy industry for almost 50 years.

Bilfinger UK is one of UK’s leading providers of integrated engineering and technical services to the process industry, employing more than 2,500 people operating across 10 UK offices.

Both businesses are part of international industrial services provider Bilfinger.

Bilfinger is a leading international industrial services provider. The Group enhances the efficiency of assets, ensures a high level of availability and reduces maintenance costs. The portfolio covers the entire value chain from consulting, engineering, manufacturing, assembly, maintenance and plant expansion to turnarounds and also includes environmental technologies and digital applications.

The company delivers its services in two service lines: Engineering & Maintenance and Technologies. Bilfinger is primarily active in Europe, North America and the Middle East. Process industry customers come from sectors that include chemicals & petrochemicals, energy & utilities, oil & gas, pharma & biopharma, metallurgy and cement. With its ~ 30,000 employees, Bilfinger upholds the highest standards of safety and quality and generated revenue of €3.5 billion in financial year 2020.
