

# ENGINEERING & DESIGN: WE MAKE IT WORK

TRANSLATING COMPLEX ENGINEERING AMBITIONS INTO A WORKING REALITY

# ENGINEERING & DESIGN: WE MAKE IT WORK

**Bilfinger UK are part of a network of qualified engineering professionals worldwide, who work together as a single source for green and brownfield projects, plant expansions, turnarounds and optimisations of industrial assets.**

**Our engineering business unit consists of a vast number qualified professionals who successfully deliver independent and innovative engineering solutions to our customers across the UK.**

**We ensure we fully understand your market, ambitions and vision to deliver every project on time, within budget and to a high quality of standard from start to finish.**

**We are your independent partner on every level, flexible, solid and safe. This is how 'We Make Ideas Work!'**

## Our Capabilities

- Mechanical & Piping
- Electrical, Control & Instrumentation
- Civil & Structural
- 3D Design & Modelling
- Consultancy
- Engineering Management

## Our Experience & Promises

**Delivering independent and innovative engineering solutions to the industry.**

**Committed to long term relationships with our customers.**

A network of 8 regional offices located across the UK to ensure we always remain close to our customers.

Over 40 years' experience of working for a wide range of markets within the industry.

Providing engineering & design services, which cover the full lifetime of an industrial installation.

Experienced in small and large projects including greenfield, brownfield, extensions, turnarounds and optimisations.

## A Transparent Design Process

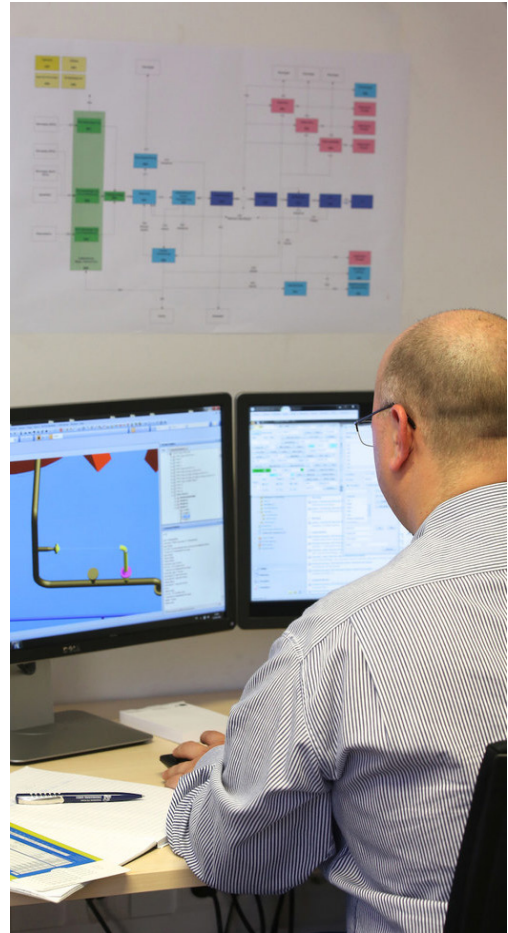

We use Building Information Modeling (BIM) software as the basis of all of our industrial design projects as it allows our engineers to involve our customers throughout the design process. This enables us to provide a digital disclosure of the project data to our customers to ensure risks are identified in the earliest stages of the process which removes any hidden surprises and reduces costs.

## HSEQ Approved

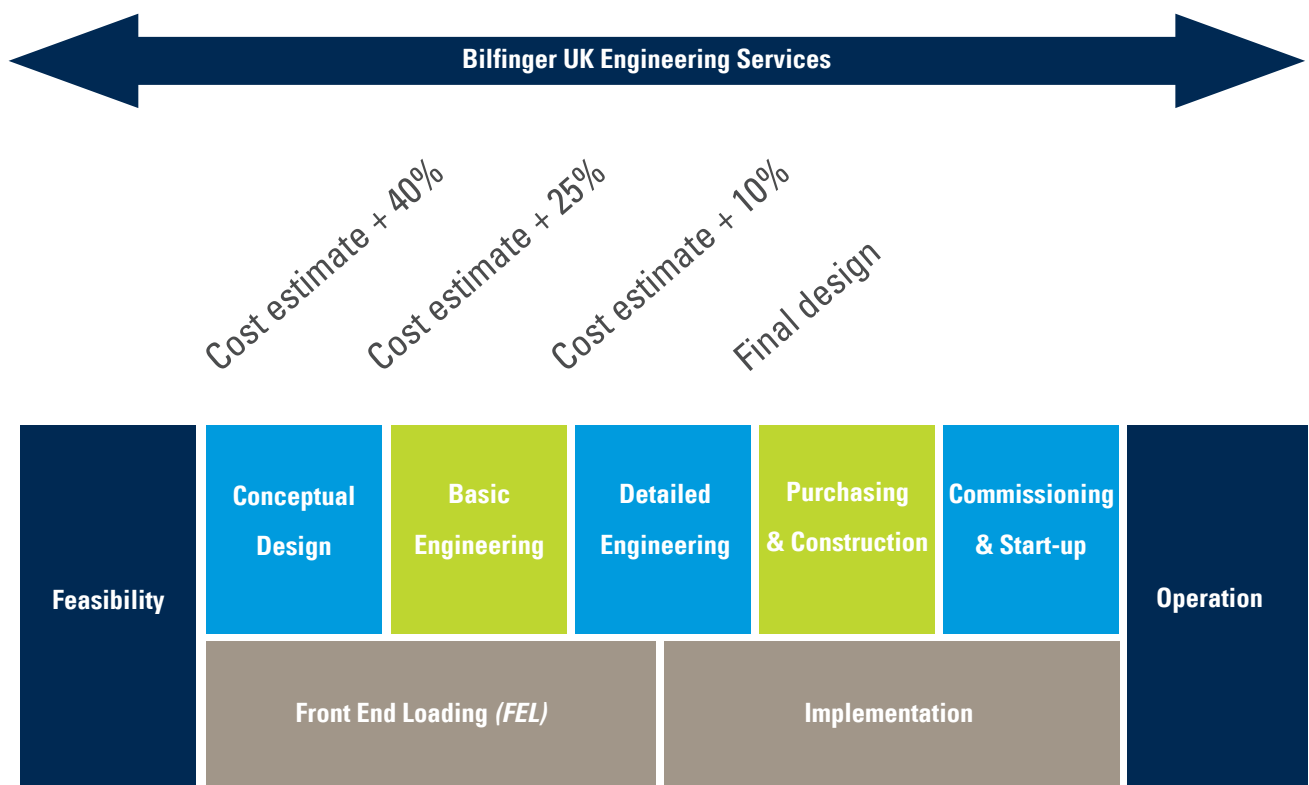

Health, Safety, Environment and Quality are at the core of all of our operations. This is why we aim for our operations to have zero impact on people, communities and the environment. To consistently deliver top quality operations we implement a common approach, using value-based principles and acting on international standards in HSEQ.

## Customer Focused

We always have our customers' interests in mind, this is why we closely monitor their markets to advise them of any changes that occur which present opportunities for them to act on that will add value to their investment with our services. In trusted relationships with our customers we are able to optimise our services to safeguard any changes and developments required within their projects.

## Your Engineering Partner Throughout All Project Phases
