

MULTIDISCIPLINARY SOLUTIONS

SINGLE SOURCE OPTIONEERING

Bilfinger UK can offer a turnkey solution to deliver a project without relying on others, and can take the project from concept to completion using our highly skilled engineering, operations and service support teams. We take the customer's needs, ensure we have listened and fully understood their requirements and replay this to them to confirm our understanding and give them the peace of mind that their project is in safe hands with a single-point of contact to keep communications swift and concise.

Integrated management & delivery

A successful project starts with the right team with the right experience who have listened and understood what the deliverables are and how we can optimise the delivery to provide the best possible service in a cost-effective manner. We have this capability and are ready to work with you to realise your requirements

Panel design & manufacturing

With a state-of-the-art 33,000 square foot Panel Design & Manufacturing Facility in Haydock and a team of design and manufacturing engineers, we are readily to take your build to print or custom design and produce a competitive, quality solution to meet the strictest of deadlines.

Service support

With a dedicated 24/7/365 helpdesk we can deploy our highly-skilled engineers to meet a mutually agreed SLA ensuring maximum uptime for your facility. We also offer obsolescence, cyber and panel surveys for existing and new customers.

Consultancy & feed

Our engineering team have a wealth of experience across all industries and are well-versed in taking a client's requirements and evolving them into a robust plan.

Electrical, control & installation

Our installation teams work with our customers to follow installation & commissioning plans to ensure start-up on time and to budget.

Engineering & design

We can provide a full multidiscipline life cycle design; whether it is E&I, civil & structural, piping & mechanical or process engineering, we have the capability to deliver the right package of services to maximise the success of your project.
